

【CLAIMS】

【Claim 1】

A 7-carboxymethyloxy-3',4',5-trimethoxy
 flavone.monohydrate represented by formula 1 having
 5 mucus protecting activity for gastrointestinal tract
 including colon.

<Formula 1>

10 【Claim 2】

A 7-carboxymethyloxy-3',4',5-trimethoxy
 flavone.solvate represented by formula 1a.

<Formula 1a>

15

【Claim 3】

The 7-carboxymethyloxy-3',4',5-trimethoxy flavone.solvate as set forth in claim 2, wherein the solvent is anhydrous ethanol.

5 【Claim 4】

A preparation method of 7-carboxymethyloxy-3',4',5-trimethoxy flavone represented in scheme 3, comprising the following steps:

(1) A compound of formula 3 is reacted with
10 methylating agent in the presence of base to convert hydroxyl group of carbon-3' into methoxy group, followed by acid treatment to prepare a compound of formula 4 (Step 1);

(2) The compound of formula 4 is reacted in the
15 presence of base with alpha-haloacetate in which carboxyl group is protected to give a compound of formula 5 (Step 2);

(3) The compound of formula 5 is reacted with
20 methylating reagent to convert hydroxyl group of carbon-5 into methoxyl group, resulting in a compound of formula 6 (Step 3); and

(4) Deprotection of the compound of formula 6 is performed, resulting in 7-carboxymethyloxy-3',4',5-trimethoxy flavone of formula 2 (Step 4).

25 <Scheme 3>

(Wherein, R' is a protecting group selected from a group consisting of ethyl, methyl, t-butyl, benzyl, trichloroethyl and silyl)

5

[Claim 5]

The preparation method as set forth in claim 4, wherein the reaction solvent used in step 1 is selected from a group consisting of dimethylformamide, dimethylsulfoxide and acetone, the base is selected from a group consisting of potassium carbonate, sodium hydroxide, potassium hydroxide and sodium carbonate, the methylating agent is selected from a group consisting of methyl iodide (CH₃I) and dimethyl sulfate

$((\text{CH}_3)_2\text{SO}_4)$, and the acid is selected from a group consisting of hydrochloric acid and sulfuric acid.

【Claim 6】

5 The preparation method as set forth in claim 4, wherein the reaction temperature is $0^\circ\text{C} \sim 150^\circ\text{C}$.

【Claim 7】

10 The preparation method as set forth in claim 6, wherein the reaction temperature is $0^\circ\text{C} \sim 90^\circ\text{C}$.

【Claim 8】

15 The preparation method as set forth in claim 4, wherein the base used in step 2 is selected from a group consisting of inorganic base such as potassium carbonate, sodium hydroxide, potassium hydroxide and sodium carbonate; alcoholic metal salt such as sodium methoxide and sodium ethoxide; alkaline metal hydride such as sodium hydride; and alkaline earth metal
20 hydride such as calcium hydride.

【Claim 9】

25 A preparation method of 7-carboxymethyloxy-3',4',5-trimethoxy flavone monohydrate represented by formula 1 of claim 1, which is characterized by the

process of stirring the compound of formula 2 obtained from the step 4 of claim 4 in a medium containing water as shown in the below scheme 4.

<Scheme 4>

【Claim 10】

The preparation method of 7-carboxymethoxy-3',4',5-trimethoxy flavone.monohydrate of claim 1 as set forth in claim 9, wherein the medium containing water is ethanol or acetone.

10

【Claim 11】

A preparation method of 7-carboxymethoxy-3',4',5-trimethoxy flavone.monohydrate represented by formula 1 of claim 1, in which the compound of formula 2 obtained from the step 4 of claim 4 was placed under humidified atmosphere as shown in the below scheme 5.

15

<Scheme 5>

【Claim 12】

A preparation method of 7-carboxymethyloxy-
 3',4',5-trimethoxy flavone.monohydrate represented by
 5 formula 1 of claim 1, which includes the steps of
 stirring the compound of formula 2 obtained from the
 step 4 of scheme 3 in anhydrous alcohol to give 7-
 carboxymethyloxy-3',4',5-trimethoxy flavone.solvate
 10 represented by formula 1a and leaving the solvate under
 humidified atmosphere as shown in the below scheme 6.

<Scheme 6>

【Claim 13】

The preparation method of 7-carboxymethoxy-3',4',5-trimethoxy flavone monohydrate of claim 1 as set forth in claim 12, wherein the anhydrous alcohol is anhydrous ethanol.

【Claim 14】

A pharmaceutical composition for the protection of gastrointestinal tract including the colon and the treatment of gastrointestinal diseases containing the 7-carboxymethoxy-3',4',5-trimethoxy flavone monohydrate of claim 1 as an effective ingredient.

【Claim 15】

A pharmaceutical composition for the protection of gastrointestinal tract including the colon and the treatment of gastrointestinal diseases such as gastritis, gastric ulcer, ulcerative colitis and Crohn's disease containing the 7-carboxymethyloxy-3',4',5-trimethoxy flavone.monohydrate of claim 1 as an effective ingredient.
